SAFE PROGRAM
Systematic Approach to a Fall-Safe Environment

HD Nursing®

The SAFE Program is a web based platform customized to assist facilities in monitoring and managing their public spaces to prevent falls.

Assess

Facilities assess for fall risk quarterly. Surveyors compare the physical environment with a tested and reviewed standard. Photos of deficiencies are uploaded to the Program.

Review

Program Administrators review deficiencies reported by surveyors and determine the priority and timeline for correction.

Communicate

Program Administrators export Program reports to their Facility Manager for follow up and correction.

Learn more about how HD Nursing's SAFE Program helps busy leaders maintain a SAFE environment for their visitors and patients.
